Overview

The WeWork Veterans in Residence program, powered by Bunker Labs, is an initiative in partnership with Bunker Labs aimed at helping US military veterans pursue their life’s work. The program was first incubated in Denver and launched nationally to 10 total cities on Veterans Day 2017.

Whether a veteran or a family member is starting a new business, looking to build their network, or trying to find their next career - WeWork Veterans in Residence Powered by Bunker Labs provides them the space, mentorship, and community they need to find their tribe and create their life’s work.
Building a Community

WeWork Veterans in Residence Powered by Bunker Labs provides fully sponsored workspace to 15 tribes of veterans across 15 cities every six months, in addition to supporting a growing alumni base for select veteran entrepreneurs.

We will serve at least 1500 Veterans in Residence and reach an additional 75,000 veterans through programming across 15 cities over the next five years.

Veterans in Residence Quarters
Each Veteran in Residence has access to fully-sponsored workspace for 6 months and the full suite of WeWork member services, in addition to access to exclusive Veterans in Residence quarters in their city, a uniquely designed lounge and meeting space in each building that hosts each tribe and is managed by resident Bunker Labs city leads.

Local & Global Community
Beyond their immediate 10 person tribe, each veteran will also have access to the global community of 320,000+ creators via the WeWork digital member network, across 335+ WeWork communities around the world. They will also have access to thousands of veteran entrepreneurs via veteran partner communities.

City-Wide Events
Bunker Labs and the WeWork Veterans in Residence will organize city-wide monthly professional and social events at WeWork to bring together leaders from the local veteran and business communities.
Key Statistics

More than \(\frac{1}{3}\) of veteran entrepreneurs said they had gained skills from their active duty service that were directly relevant to business ownership and veterans are 30% more likely to employ other veterans.

In 2012, veterans owned 2.5 million businesses in the U.S. These businesses represented 9% of all U.S. businesses, generated $1.1 trillion in receipts, employed 5.5 million people, and had an annual payroll of $195 billion.

Each WeWork Veterans in Residence Tribe will host 1 public event per month to extend our impact to the broader veteran community. Across 15 cities we could reach 75,000+ veterans through events over the next five years.

49.7% of World War II veterans owned and operated a business after leaving military service. But only 4.5% of post 9-11 veterans have started their own business. Let's help.

The WeWork Veterans in Residence program provides fully sponsored workspace to 150 veterans across 15 cities every six months. WeWork Veterans in Residence Powered by Bunker Labs will serve 1,500 veterans in 15 cities over the next five years.

**QUOTES FROM PARTICIPANTS**

“A very supportive group with strong camaraderie.”

‘The tribe was very helpful in holding me accountable to my goals.”

“My tribe was super cool with diverse industries. We found ourselves helping one another in ways never would have thought even though we were so different.”

“Some of the most intelligent, real and honest people I’ve met. Happy to give their honest feedback, constructive criticism and also fun to be around.”

“Really got as much out of [the program] as I put in. Putting myself out there and being curious about what others are up to definitely provided a response of good will.”

“Always love the events and most of the people who come there. Great way to make connections for the early entrepreneur.”
